

SIMPOE upgraded to PTC Gold Partner with SimpoePro !

As SIMPOE moves up with SimpoePro to PTC® Gold Partner status, PTC Pro/ENGINEER® users can benefit with access to the first fully embedded and complete plastic injection simulation solution to optimize the design and manufacturing costs of their plastic parts!

Torcy, France, August 31st, 2010. SIMPOE announces advancing from the Silver to Gold tier in PTC's PartnerAdvantage® program.

SimpoePro® is the first complete plastic injection simulation solution fully embedded into the Pro/ENGINEER graphic user environment. With **SimpoePro**, Pro/ENGINEER users involved in the design, development, tooling and manufacturing of plastic parts can now optimize the design of their plastic parts, minimize tooling as well as manufacturing costs, without ever leaving their familiar everyday Pro/ENGINEER graphic user environment.

SimpoePro offers the ease of use, speed and affordability of all SIMPOE solutions, and addresses the complete injection process, from part filling to part warpage.

Andy Barlow, PTC's Senior Director of Business Development, commented: *"We were impressed by how quickly SIMPOE developed the full integration of their solution within Pro/ENGINEER and are pleased to upgrade SIMPOE to Gold Partner status."*

For Thierry LEROY, SIMPOE Chief Operating Officer *" We are very pleased with our upgrade to Gold Partner status which acknowledges our commitment to the PTC community. SimpoePro offers easy to use, fast and affordable tools fully embedded into the Pro/ENGINEER environment, and is a new testimonial of our strategy to democratize plastic injection simulation."*

About SIMPOE :

Laureate of several innovation prizes SIMPOE SAS, headquartered in Torcy, France, is a French software developer specializing in plastic injection molding simulation solutions. SIMPOE software allow significant costs savings of physical mold prototypes, material cost optimization as well as a drastic reduction of the time to market of new products. Easy to use, easy to learn and affordable, SIMPOE software are targeted to the mold specialist as well as to the mechanical Engineer who, in a collaborative product development approach, wants to take into account plastic parts manufacturing constraints early in the product design stage. SIMPOE is THE missing link to implement a true Collaborative Product Development policy in the plastic industry.

SIMPOE software are available in several languages through a worldwide network of specialized Value Added Resellers.
